

The relationships we share are more valuable than the money we lend.

BancorpSouth Equipment Finance specializes in relationship based Equipment Financing for companies and municipalities in the Southeast and parts of the Midwest.

We understand that behind every decision made, every dollar spent and every piece of equipment financed there is a relationship – one founded upon trust, responsiveness, reliability and experience. At BancorpSouth Equipment Finance, we foster those relationships more than anything else to ensure that your equipment financing delivers the lasting impact you intended.

Our business model is based on three core values: strength, experience and know-how. Since 1976, we've remained steady and committed through both the healthy and the challenging business cycles. We work face-to-face with our customers to listen and understand their business before we lend. Our focus and specialty is financing equipment for businesses and municipalities – the tools that build and power America.

Welcome to BancorpSouth Equipment Finance.
